CGN Becomes Certified Solution Partner for LLamasoft

Peoria, Illinois – November 16, 2010 – CGN, a global business performance consulting firm with a presence in the United States, Europe, China and India, has been selected by LLamasoft to be one of its Certified Solution Partners (CSP).

The CSP program was developed to provide LLamasoft clients and prospects with consulting partners with a known track record of continuously delivering quality supply chain analysis projects. CGN has been working with LLamasoft's Supply Chain Guru technology since early 2009 and has delivered significant value to its client base on a number of engagements, including projects in the CPG and heavy industry business verticals.

"We have been impressed with the continual advancement of LLamasoft's technology in both optimization and discrete event simulation areas, which has enabled our solutions team to spend more time analyzing supply chain models and less time building them. In addition, the professional services team at LLamasoft enabled our team to get up and running quickly and their response to simple and complex questions has been outstanding," stated Navneet Arora, Partner at CGN.

"CGN has been a great partner to work with" says John Ames, Vice President of Alliances at LLamasoft. "They take a collaborative approach to developing a supply chain model for analysis and understand best practice processes for developing optimization and simulation models.

Mr. Ames added, "Our goal with our consulting partners is to help grow their consulting expertise in the area of supply chain design and analysis, while at the same time supporting their efforts with our team's deep domain knowledge in our technology and modeling approach. We envision in the next few years to have a global footprint of certified implementation partners that our clients can turn to for best in class consulting support that spans a broad set of verticals."
