

CGN Global and Microsoft SharePoint

SharePoint Solutions

Whether you are considering SharePoint as a business collaboration platform within your organization or as your Internet platform, CGN Global offers comprehensive SharePoint implementation services. We are a Microsoft Gold Certified Partner and have a proven track record of delivering best-in-class solutions for Fortune 500 clients across a wide spectrum of industries including consumer package goods, government and financial services. We bring an unmatched understanding of critical business challenges specific to industries as well as some of the most comprehensive and proven applications utilizing SharePoint. We consistently deliver effective and innovative solutions that align with organizational requirements for next generation collaboration, information management and Internet platform.

- Communities – SharePoint 2010 Communities delivers great collaboration tools—and a single platform to manage them. Make it easy for people to share ideas and work together the way they want.
- Content – SharePoint 2010 Content makes content management easy. Set up compliance measures “behind the scenes”—with features like document types, retention policies, and automatic content sorting—and then let people work naturally in Microsoft Office.
- Search – SharePoint 2010 Search cuts through the clutter. A unique combination of relevance, refinement, and social cues helps people find the information and contacts they need to get their jobs done.
- Insights – SharePoint 2010 Insights gives everyone access to the information in databases, reports, and business applications. Help people locate the information they need to make good decisions.
- Composites – SharePoint 2010 Composites offers tools and components for creating do-it-yourself business solutions. Build no-code solutions to rapidly respond to business needs.

CGN Global’s SharePoint Services

- Strategy – Uncover business challenges that drive technology investments.
- Governance – Establish rules and regulations to control processes, development and adaptation.
- End-User Experience – Leverage investments and adapt as an internal or external environment.
- Development – Build solutions that meet business and technical requirements with manageable development costs.
- Performance – Optimize the responsiveness and availability of solutions.
